

We are very glad to become a partner of such an impressive international exhibition as Gift Show Fair 2015 in the capital of Poland Warsaw. An international exhibition is always a great chance to meet new partners, present your business and find new ideas.

This time our Knowledge and Technologies Foundation for Small and Medium-sized Business „Viktoria“ is excited to introduce a group of companies from the Kaliningrad Oblast (Russia). They present regional souvenir and creative industries including amber processing enterprises.

The Kaliningrad Region being the most western part of Russia is often called "The Amber Land". A visitor who comes to Kaliningrad for the first time soon realizes that the word "amber" is the most often found one in the names of companies, goods and services. And this is for good reason. The Kaliningrad region has been known from classical antiquity as a main source of amber in Europe. Around 90% of the world's amber deposits are located here.

The amber industry is one of key businesses in the region bringing together best masters and well-known artists and attracting thousands of visitors every year. Today Kaliningrad companies try to maintain the tradition of high-quality amber processing creating unique highly artistic products. At the same time they are looking for new technologies of processing and use of the "sun stone". For instance, our Foundation is running several projects where amber is used as a main component in medical and beauty goods.

Nowadays Kaliningrad ranks among the most fast-growing territorial entities of the Russian Federation. It has become possible not only due to the achievements in traditional manufacturing fields, but also due to the development of modern innovative technologies and productions based on the latest scientific researches.

Knowledge and Technologies Foundation for Small and Medium-sized Business „Viktoria“ is a platform that enables the international exchange of technologies, know-how and information among companies, research institutions, industry associations therefore increasing their international competitiveness. Our Fund serves as an efficient entry point that provides safe and easy access to a vast Russian market for technologies and goods.

Dear Friends, we invite you to cooperation!
See you at our Foundation Viktoria, Kaliningrad booth ____!

Oleg Matukevich, the President of Knowledge and Technologies Foundation for Small and Medium-sized Business „Viktoria“
